DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Cretu-Petra (US Patent Number 5,868,311).

Cretu-Petra discloses an electronically controlled fluid dispensing apparatus (and the associated method of use) comprising: an electronically controlled valve assembly including a valve cartridge housing a valve (30) and a motor (23, 24) coupled to the valve cartridge to control at least one aspect of fluid dispensation from the valve; and a controller (20) communicating with the motor to provide electronic instructions for controlling movement of the valve; wherein the valve comprises a ceramic valve insert comprising a ceramic disc (see column 4, lines 8-10).

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Humpert et al. disclose a similar electronically controlled fluid dispensing apparatus. Orlandi et al. disclose the benefits of ceramics in valve cartridges.
